ABOUT ME

Strategic and execution-driven **Product & Delivery Manager with 8+ years** leading at the intersection of engineering, product, and business in emerging technologies. Expert at translating complex technical systems into executable plans, aligning developers and non-technical stakeholders, and driving delivery through clear processes, prioritization, and operational rigor.

EXPERIENCE

Product & Delivery Manager

Andromeda Protocol

Remote ET-CET

April 2024 - December 2025

- Led delivery and operations of a blockchain operating system (aOS), aligning engineering-heavy teams with product and business goals to enable consistent monthly releases and multi-chain integrations by establishing execution frameworks that enabled predictable, monthly releases in a distributed, multi-timezone environment.
- Translated complex protocol-level architecture into actionable roadmaps and priorities, aligning technical execution with product goals and enabling faster, clearer decision-making for non-technical stakeholders.

Project & Operations Manager

Parkfield Commerce

Remote ET

March 2023 - June 2024

- Partnered with clients and senior stakeholders to translate growth goals into execution, coordinating design, development, and marketing teams to deliver eCommerce initiatives that improved performance, conversion, and revenue outcomes for Shopify Plus brands.

Product and Design Team Manager

Advanced Blockchain | Composable Finance

Remote CET

March 2022 - December 2022

- Led product and design delivery operations across a Web3 R&D lab and live protocol initiatives, coordinating design, engineering, and product teams from concept through MVP and public launch.
- Owned roadmap execution and launch planning for XCVM (a cross-chain VM), aligning technical delivery with strategic goals and enabling a successful MVP presentation at Cosmoverse 2022, while introducing execution frameworks to reduce delivery friction.

EARLIER EXPERIENCE

Program & Project Management

Tech, Public Sector & Agencies

Buenos Aires, Argentina

2017-2022

- Led complex, multi-stakeholder technology initiatives across public sector, digital agencies, and enterprise environments, coordinating technical and non-technical teams to deliver large-scale systems, internal platforms, and digital products.
- Built strong execution foundations early in career, managing high-impact programs, tight timelines, and cross-functional dependencies in regulated and fast-moving contexts.

SKILLS

Skills: Product Development, Technical Program Management, Agile, Stakeholder Management, Web3.

EDUCATION

Universidad Católica Argentina, Buenos Aires

International Relations and Politics

2015-2018
